

Rainmeter Clock Widget for Windows

By Cher (cherthemusic.org)

How Do I Get the Rainmeter Clock Widget for Windows?

- Go to <https://www.rainmeter.net/>
- Click the Download button of the latest version of Rainmeter
- After getting the download file, install the Rainmeter file on your PC.
- Once installed, you will see small boxes on your desktop which is known as skin. You can right click on it and select Unload Skin to remove it. I kept some of them just to know the health of my PC storage.
- Go to <https://visualskins.com/skin/elegant-clock> and select Download Elegant Clock.
- Install after downloading Elegant Clock.
- Go to the System Tray area (bottom right of Windows Desktop) and select the Rainmeter icon.
- Expand the Elegant Clock folder and you will see two versions of it: Dark Clock and Light Clock.
- Depending on the colour or design of your Desktop Background, choose a suitable one and click the Load button.
- After which you will see the clock on your desktop.
- You can change the position of the clock by clicking the clock and dragging it around the screen.
- You're done!
